Qualified for regionals and made it to top 10 in East Zone of India.

GeeksForGeeks

Hackathon

May 2023

PROJECTS

Health Plus

HTML, CSS, NodeJS, ExpressJs, MongoDB

- A web application focusing on digitalizing the medical sector for a smooth and fluent flow of prescriptions among medical institutions.
- Integrated OAuth and expanded support for login via phone number using Twilio's API.
- Adjusted database schemas considering scalability support.

TailWay

React, NodeJs, MongoDB, GraphQL

- Working on building a platform that enables pet owners to share stories and feeds about their pets.
- Users can create separate profiles for each of their pets, and access resources such as training tips, food recommendations, vaccination schedules, and breed news.
- The platform provides a comprehensive set of tools and resources for pet owners to care for their pets, including advice on health, behavior, and other aspects of pet ownership.

SKILLS & INTERESTS

Skills: C++ | JAVA | HTML | CSS | NodeJS | ExpressJS | React | MongoDB | MySQL | Figma | GCP

Interests: I have a constant urge to experiment with things, read and produce music in my spare time.
